GroupMail Marketing Pack 6.00.049 Crack+ PC/Windows

GroupMail Marketing Pack Activation Code is an interesting and powerful software solution for managing and keeping track of large email marketing campaigns. Probably the first fact that helps towards making GroupMail Marketing Pack such a comprehensive utility is its collection of 142 HTML email marketing templates. This allows users to rely on already defined settings and layouts for creating and sending newsletters swiftly. Its overall speed is partly made possible thanks to a feature that helps users bypass the external SMTP mail servers with Direct Sending. Users with Microsoft OneDrive cloud storage accounts can be satisfied to hear that the software solution integrates with the aforementioned service. This enables them to sync and access their GroupMail data from any location and by using any device with Internet connection. The program comes with an 'Autoresponder' feature for sending automatic newsletter marketing drip campaigns. Users might want to take advantage of the fact that GroupMail Marketing Pack can integrate Facebook, Twitter, LinkedIn and Google+ profiles in their emails. Another advantage is represented by the fact that the tool enables users to place Tweet buttons inside their emails, so that readers can share newsletters with just a few mouse clicks. Furthermore, to make the whole process as unobtrusive as possible, the application enables its recipients to quickly unsubscribe via its opt-out and bounce processing options. Real-time campaign reporting and spam score check are also part of GroupMail Marketing Pack's feature list, for ensuring that the email delivery does not become too annoying for recipients. It also comes with 256 simultaneous delivery connections for fast email sending and it supports email marketing campaigns scheduling. All in all, GroupMail Marketing Pack is a fast and comprehensive software solution for managing and sending newsletters. It makes the process simple partly thanks to its built-in collection of templates and partly to its other advanced sending options.
